

NOAD EQM4 SAP-BOBJ IDD Migration

How to provide confident evidence?

Jurjen Noorloos • Sr. Engineer NOAD

André Grift • Co-Founding CEO & President NOAD

Agenda

- Welcome & Thank you
- Introduction NOAD & NOAD EQM4
- Migrate SAP BusinessObjects
- Conclusion and Q&A

NOAD

- Founded in 2000, privately held operating with HQ's in the United States (New York) and Europe (The Netherlands – Amsterdam)
- Over 230 global blue chip customers (i.e. GE, Cisco, USAF, ING, Philip Morris, JPMorgan Chase, BNP Paribas, Abbott Lab, Vodafone, Fannie Mae, HCA, T-Systems ...)
- Certified SAP Software Solution Partner (frm. Technology Partner BOBJ - Gold Level, 2nd performing in '06/'07)

NOAD EQM4 SAP BusinessObjects

- The only SAP Certified pre-packaged, end-to-end, integrated software solution for
 - Change Management
 - Integrated Life Cycle Management (version control)
 - Deployment Automation
 - Custom workflows, segregation of duties and scalability
 - User Activity Monitoring
 - On line, real time audit ability and real time user support
 - Compliance Management
 - Auditing and security

NOAD's **S P E C S** Methodology

- SCAN - Make an inventory
- PLAN - Plan the future deployment
- EXECUTE - Migrate efficient and effective
- CONTROL - Guarantee and provide confidence with evidence
- SUPPORT - Continue to be in control

SCAN your deployment

- Scan your SAP BOBJ deployment
 - Universes, documents, users, releases
- Determine related 'items'
 - Documents & Universes
 - Users & Documents

PLAN your migration for successful adoption

- Migration plan
 - What & When
- Architecture setup
 - Structure & Security
- Test plan
 - Who & What
- Education /Training plan
 - Maximum ROI

EXECUTE the migration

- Migrate with SAP BusinessObjects Import Wizard
 - Partner with Limited Liability
- Use Migration Folders
 - Maintain control

Migration facts

- -11% universes
- -31% scheduled documents
- -30% corporate documents

CONTROL the new deployment

- Populate the new architecture
- Test content
 - Monitor progress and report on issues
- Correct issues when needed
 - Manage Life Cycle
- Promote to Production
 - Via controlled workflow
- Keep Track at all times!!

SUPPORT your leadership

- Increase the predictability of deployment, maintenance, and support costs
- Adhere to standard development and change management processes
- Faster return on your BI investment; shelf ware management
- Ensure regulatory compliance and support governance
- Monitor user activity

Some Blurps

- NOAD EQM is imperative for our SAP BusinessObjects deployment to comply with guidelines such as SOXA and Basel II (Stater N.V.)
- NOAD EQM has done so much for my sanity around here. I have never been so comfortable with universe deployments before (GE)
- Absolutely! I would be glad to serve as a reference (JPMorgan Chase)

Platform Management for SAP BusinessObjects

Q. How does a top European mortgage company with over 1 million mortgage loans under its administration, totaling €163,412,000,000 in value, and handling 30% of all mortgages in The Netherlands manage their extensive SAP BusinessObjects environment?

A. NOAD EQM

Challenge: Stater is the end-to-end service provider for the European mortgage market, and supports mortgage financiers in the sale, processing and financing of mortgage portfolios. The management of their massive portfolio requires providing their customers with a state-of-the-art, paperless and workflow-driven process must be performed flawlessly and in full accordance with compliance guidelines such as SOXA, SAS70 and Basel II. With over 800 SAP BusinessObjects documents, it became essential that all changes were accountable, registered automatically according to compliance guidelines, and fully documented.

Solution: Realizing that extended version control in SAP BusinessObjects was lacking, Stater implemented NOAD EQM for their version control and deployment automation. Stater also controls their technical documentation with NOAD EQM, making it possible to restore previously approved versions in a production environment without searching for a particular version on their many file servers. Additionally, NOAD EQM provides real-time, online audit trails of every change, complete with time-stamps and user details.

Quote: "NOAD EQM is imperative for Stater's SAP BusinessObjects deployment to comply with guidelines such as SOXA and Basel II"

In the 21st Century IT organization

Change management is more than just a good idea; it's a business imperative for the IT organization that wants to fulfill its business objectives successfully.

By creating the culture, controls, and credibility of successful change management, today's IT organization can finally lock down change management – and realize the benefits of being a high performing IT organization.
